Hazard Communication

June 30, 2009

Thomaston Town Hall

Thomaston, Connecticut

9:00 AM – 11:00 AM

Registration begins at 8:30 AM

Learning Objectives

The Hazard Communication Standard, 29 CFR 1910.1200, provides workers who are exposed to hazardous chemicals with the right-to-know about the identity of the hazards of the chemicals in their workspaces. The OSHA standard also requires employers to provide training on appropriate protective measures.

This program consists of the following topics:

- Explanation of the OSHA HAZCOM Standard, 29 CFR 1910.1200.
- Explanation of toxic substances in the workplace and identifying what appears on a product label.
- Discussion of the information presented in the 8 sections of the Material Safety Data Sheets (MSDS).
- Explanation of the purpose of a MSDS.
- Definition of the words and terms found on a MSDS.
- Explanation of where MSDS's are kept.
- Identify rights and responsibilities of employees.
- Discuss methods of controlling physical and health hazards.

Summary

This workshop explains the OSHA Hazcom Standard; the rights and responsibilities of employees regarding toxic substances; and the purpose and use of a Material Safety Data Sheet.

Audience

This workshop is designed for

- Public Works Directors, Supervisors & Employees
- Risk Managers
- Fire Chiefs and Fire Safety Officers
- Police Chiefs/Training Officers
- Parks & Recreation Directors, Supervisors & Employees
- School Custodians
- School Nurses
- Maintenance Personnel

“ Hazard Communication is one of the most widely violated OSHA standards in municipalities. Learn the appropriate protective measures in this free workshop. ”

Mark Wantroba

Senior Risk Management Consultant
CIRMA Risk Management Services

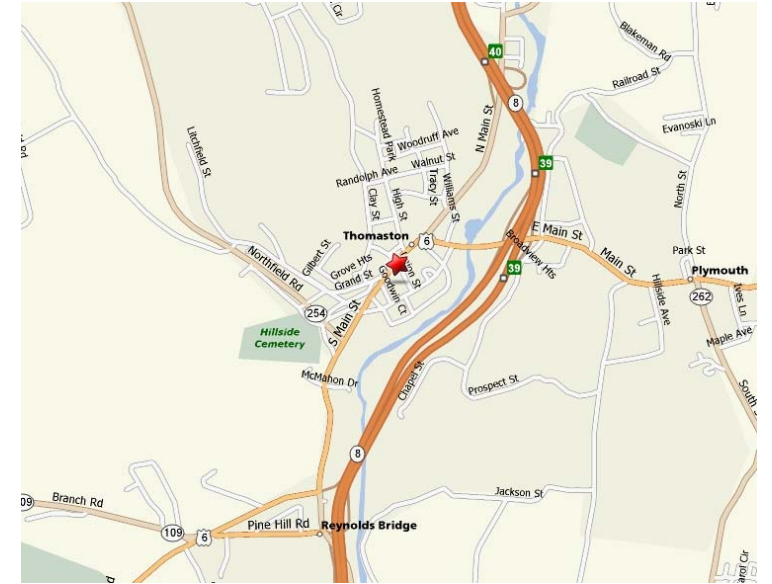

Mark serves as a Senior Risk Management Consultant for CIRMA's Risk Management Services. He has over twenty years experience working in the commercial insurance industry providing risk management and safety and health services.
