🌐 <https://resourcele.com>

Resource Lighting & Energy, Inc. (RLE) provides turnkey solutions for the electrification of heating and cooling systems, from site assessment to incentive application and installation to warranty.

What is electrification?

The “electrification of heating” refers to the process of replacing or complementing fossil fuel heating systems, such as propane, natural gas or oil, with electric heat pumps. **All-electric heat pumps are the most popular technology for decarbonizing heating and cooling systems.**

Funding Available for Electrification Projects

RLE works with Eversource to seamlessly install HVAC upgrades! Starting this year, Eversource launched their new electrification program designed to assist with improving upon or implementing new HVAC systems. With this new program, CT Municipalities qualify for up to **\$3,250 per ton in rebates**. In addition, up to **\$5,000,000 in on-bill funding at 0% interest** is available per town or city.

Funding may be limited...so act fast. **Contact us today to schedule a no-cost HVAC assessment and secure these funds while they are still available!**

By 2040...

The CT DEEP (Department of Energy and Environmental Protection) assumes heat pump deployment would **triple by 2040** under its electrification modeling scenarios.

CT Department of Energy and Environmental Protection
2022-2024 Conservation and Load Management Plan (C&LM)

Air Quality in Schools

The CEA (Connecticut Education Association) mandates acceptable temperature and humidity ranges (68°-76°; 20%-60% humidity levels) to be maintained by CT schools by June 30th, 2026.

RLE is here to help you install a new heating and cooling system to meet these regulations.
