Plan for Microsoft 365 Government - GCC deployments
03/02/2020 • 4 minutes to read • 🌐 🔗 🔖 🔴 • Applies to: Microsoft Teams

This guidance is for IT pros who are driving deployments of Office 365 in US federal, state, local, tribal, or territorial government entities or other entities that handle data that's subject to government regulations and requirements, where the use of Microsoft 365 Government - GCC is appropriate to meet these requirements.

Note
If your organization has already met the Microsoft 365 Government - GCC eligibility requirements and applied for and been accepted into the program, you can skip steps 1 and 2 and go directly to step 3.

Step 1. Determine whether your organization needs Microsoft 365 Government - GCC and meets eligibility requirements.

The Microsoft 365 Government - GCC environment provides compliance with US government requirements for cloud services, including FedRAMP Moderate, and requirements for criminal justice and federal tax information systems (CJJ and FTI data types).

In addition to enjoying the features and capabilities of Office 365, organizations benefit from the following features that are unique to Microsoft 365 Government - GCC:

- Your organization’s customer content is logically segregated from customer content in the commercial Office 365 services from Microsoft.
- Your organization’s customer content is stored within the United States.
- Access to your organization’s customer content is restricted to screened Microsoft personnel.
- Microsoft 365 Government - GCC complies with certifications and accreditations that are required for US Public Sector customers.

You can find more information about the Microsoft 365 Government - GCC offering for US Government customers at Office 365 Government plans, including eligibility requirements.

Helping businesses and schools stay connected in response to Coronavirus

As more employees, educators, and students work remotely in response to the spread of COVID-19, we want to do our part to help them stay connected and productive. G Suite and G Suite for Education make up our collection of productivity apps that help businesses and educators collaborate no matter where they're located.

We're committed to helping students and their teachers continue learning outside of school. In Hong Kong and Vietnam, where schools have already been closed, we've seen
